

DSSL2 – Deepwater Oil Spill Solution Factsheet

Properties DSSL2	floating	
	non-toxic and odorless	
	insoluble in water	
	no negative impact or influence on nature or population	
Deployment	can be brought out along the coastline with boats or ships	
	for big oil spills the material can be dropped directly by air on the oil spoiled areas	
Waste	none	
	DSSL2 and crude oil are reusable after a simple separating process	
Availability	short term there	several 1000 tons
	within a few weeks	up to 50000 tons
Function	fast and reliable (tested)	between 50 -100 degrees Fahrenheit
	freezes the oil spill	
	removable from the water surface	
	cleans up the water	
Process status	in the laboratory	tested 100 times in several versions and possibilities
	in the fields	not yet tested
	patent pending	
Costs	very cost efficient	
	many times cheaper than the harm who results without dssl_2
